

British Columbia Mining Alliance

Collaborating to create **sustainable investment opportunities in British Columbia, together.**

The BC Mining Alliance (BCMA) is a partnership between Indigenous nations, industry, the Association for Mineral Exploration, and provincial government representatives. This unique collaboration aims to promote British Columbia's mining opportunities internationally, with a focus on exploration projects.

Alumni Members:

This collaborative effort welcomes the opportunity to share knowledge, best practices, success stories and lessons learned, from grassroots exploration, through permitting and into operations from the perspective of all partners across our sector.

The BCMA plays a key role in advancing British Columbia's commitment to lasting reconciliation by demonstrating what meaningful engagement and collaboration with Indigenous nations looks like. Our success stories with the Nisga'a Nation demonstrate the vast opportunities for joint decision-making, wealth and capacity building, employment, revenue sharing, investment, economic growth, and partnership with Indigenous nations and businesses across the entire mining life cycle.

The BC Advantage

British Columbia's reputation for rich resources, stable government and a supportive business environment attracts investors from around the world. BC is a world-class mining jurisdiction, rich in mining history and home to seventeen operating mines and a thriving mineral exploration sector.

The Province, Indigenous nations and industry are working together to support an innovative, competitive and responsible mineral exploration and mining centre. Responsible resource development rooted in local partnerships is the new way of doing business — and BC is leading the way.
